

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows.

1. - 10. (Canceled)

11. (Currently Amended) A printing method,

wherein a computer displays a print acceptance screen based on page data sent from a ~~given node~~first network printer on a network,

the print acceptance screen comprising:

a first area for a user to specify a ~~peripheral device~~scanner to ~~capture~~acquire print data;

a second area for the user to specify control information for the ~~scanner~~peripheral device to use when ~~capturing~~acquiring the print data; and

a third area for the user to specify a second network printer on the network ~~made~~ to print on the basis of the print data, and

wherein the computer ~~acquires the print data from the scanner specified in the first area in accordance with the control information in the second area and sends a[[n]] acquisition/print request for printing to the second network printer specified in the third area.~~

12. (Currently Amended) A printing method,

wherein a computer displays a print acceptance screen based on page data sent from a ~~given node~~first network printer on a network,

the print acceptance screen comprising:

a first area for a user to specify a ~~peripheral device~~scanner to ~~capture~~acquire print data;

a second area for the user to specify control information for the peripheral device~~scanner~~ to use when ~~capturing~~acquiring the print data; and

a third area for the user to specify a second network printer on the network ~~made~~ to print on the basis of the print data, and

wherein the computer sends a[[n]] ~~capture~~acquisition/print request to the ~~peripheral device~~scanner specified in the first area to cause the peripheral device~~scanner~~ ~~[[9]]~~to ~~capture~~acquire the print data in accordance with the

control information specified in the second area and to send the ~~captured~~acquired print data to the second network printer specified in the third area, thereby causing the second network printer to print.

13. (Previously Presented) The printing method of claim 11, wherein the control information comprises resolution of the print data.
14. (Currently Amended) The printing method of claim 11, wherein the control information comprises a mode of ~~[[the]]~~a scanner.
15. (Canceled)
16. (Previously Presented) The printing method of claim 12, wherein the control information comprises resolution of the print data.
17. (Currently Amended) The printing method of claim 12, wherein the control information comprises a mode of ~~[[the]]~~a scanner.
18. (Canceled)
19. (New) The printing method of claim 11, wherein the second printer causes the peripheral device to capture the print data.
